

An Introduction to Poetry Writing

An Introduction to Poetry Writing

Description:

This class is designed for the novice as well as the experienced poet. It will discuss how poetry differs from prose by comparing the rules of prose and poetry. In-class discussion will take a step-by-step consideration of a poem from inspiration to completion. Classic and contemporary poems will be examined for technique, with discussion of structure and poetic devices. Students will be taught how to respond to a prompt, as well as how to mine their own experiences for inspiration. There will be no tests, no homework, and no one will be asked to share their work. The focus of this class is to answer questions and provide insight into writing poetry.
